

Opportunities in a Low Carbon Future

The service

This workshop provides the latest peak oil, climate change and economy-related facts and projections, explores how systems thinking can help organisations to understand these issues, and looks at where your greatest organisational vulnerabilities might lie. It then identifies opportunities that will arise in a low-carbon energy-constrained economy and introduces the innovative Transition Approach. You will begin to work with some of the visioning activities that will further unleash the creativity of your workforce, while exploring the business case and practicalities essential to support realisation of your vision.

The delivery

Our practitioners will work with you to tailor the workshop to align with your progress to date on these issues. The workshop is then delivered over 1-2 days.

Transition Training and Consulting

43 Fore Street, Totnes, Devon, TQ9 5HN
Email: info@ttandc.org.uk
Telephone: 05601 531882
Website: www.ttandc.org.uk

The benefits

You will begin (or continue) your work to assess the likely impacts of peak oil and climate change on your operations. You will understand your current vulnerabilities and new revenue opportunities. Your employees will be more engaged in creating a positive vision of your future, where your organisation is increasingly resilient, and open to new directions. This work will be carried forward by an engaged, empowered and enthusiastic group with tools and techniques to work together in new ways, and spread this energy and commitment throughout your organisation.

Who is this for?

This workshop is inclusive and engaging for all employees. It may be tailored to suit a particular team or division, or run with a cross-section of people. Ideally attendees will then have the time and the remit to act on the workshop outcomes.
